- **TRUCOAT HAND HELD**
- **JETROLLER**
- **THE PRO CONNECT TECHNOLOGY**

How have thousands of contactors been more profitable with Graco handheld sprayer?

- They have eliminated material waste by avoiding wetting out their big rig and hose to do a small job.
- They have saved labor by eliminating set-up and clean-up time of using their big sprayer.
- They save labor by increasing their speed by 4 to 5 times versus doing small jobs with a brush or roller.
- They get the finish their customers demand.

Jet Roller 3 tools in 1. The speed of spraying combined with the quality of rolling!

Lightweight and portable, the JetRoller consists of a spray roller, a spray extension and a hand roller in one complete kit. It fits existing airless sprayers and is the ideal time-saving addition to your painting arsenal. The JetRoller combines rolling and spraying into one action, saving time and labor on spray/back roll projects. Ideal for rough or porous surfaces, the JetRoller minimizes overspray and delivers a consistent quality finish.
